Section C: Suggested Reviewers

Obtaining the two referee reports necessary for DHET subsidy is an onerous task.

Please provide the names and contact details of three qualified South African and/or international referees. Referees should have a PhD and expertise in the relevant area of Physics. Do not recommend referees who have co-authored a work with any of the authors on the manuscript within the past five (5) years. Manuscripts without three recommended referees may be subject to desk rejection.

Section D: Declaration of Novelty and Use of AI

How is this submitted manuscript scientifically novel?

This manuscript is scientifically novel because there is very little existing literature reporting on the detection of drug resistant Tuberculosis using Surface Plasmon Resonance. In addition, according to my knowledge, there is limited literature comparing two different biorecognition elements for use on the SPR system as well as for the detection of drug-resistant TB genes.

Please see the Author Guidelines for the AI use policy.

How was AI used in the generation of this manuscript?

No Artificial intelligence (AI) was used to generate this manuscript.

Section E: Plagiarism
