## Section C: Suggested Reviewers

Obtaining the two referee reports necessary for DHET subsidy is an onerous task.

Please provide the names and contact details of three qualified South African and/or international referees. Referees should have a PhD and expertise in the relevant area of Physics. Do not recommend referees who have co-authored a work with any of the authors on the manuscript within the past five (5) years. Manuscripts without three recommended referees may be subject to desk rejection.

## Section D: Declaration of Novelty and Use of AI

### How is this submitted manuscript scientifically novel?

There are limited studies on the use of riboflavin in photodynamic therapy. Moreover, its use in A549 lung cancer cells is even more limited. This manuscript aimed to elucidate the role of riboflavin-mediated photodynamic therapy in the treatment of A549 lung cancer cells. The effects of riboflavin alone (dark toxicity) and riboflavin with 470 nm laser therapy at 5 J/cm<sup>2</sup> were studied.

**Please see the Author Guidelines for the AI use policy.**

### How was AI used in the generation of this manuscript?

The authors declare that no AI was used for the construction of this manuscript

## Section E: Plagiarism
