Obtaining the two referee reports necessary for DHET subsidy is an onerous task.

Please provide the names and contact details of three qualified South African and/or international referees. Referees should have a PhD and expertise in the relevant area of Physics. Do not recommend referees who have co-authored a work with any of the authors on the manuscript within the past five (5) years. Section D: Declaration of Novelty and Use of AI

How is this submitted manuscript scientifically novel?

We are using a combination of models to constrain pulsar parameters.
Thus, our method is more holistic than what was done before.
~~Applying a combination of models should lead to more stringent constraints~~
on the shared parameters and provide us with a big-picture view.

Please see the [Author Guidelines for the AI use policy](#).

How was AI used in the generation of this manuscript?

I used AI tools to help make both the writing and coding processes smoother while working on this manuscript. Grammarly provided grammar and style suggestions to improve my writing, and Google Gemini was helpful for troubleshooting and refining my code. All the research decisions, analysis, and interpretations were made independently. The AI tools simply supported me in communicating my work and managing technical details more effectively.

Section E: Plagiarism

	Yes
I am aware that plagiarism detection software may be used on my manuscript.	X
